

# COVID-19 Campus Analytics

## Reopen your campus while managing risk.

Utilize Eide Bailly's COVID-19 Campus Analytics solution to quickly understand the current and trending health and risk level across your campus. Visualize and drill through available testing results, compliance efforts, population wellness, and high-risk areas in your institution. Collecting data is valuable, but your campus needs to move beyond data collection and into intelligence and action to effectively mitigate risk and manage response.

Take control of your data and your COVID-19 risk management plan with Eide Bailly's dashboard and integrated reporting solution for higher education institutions.

### The Value

Discover where your students, faculty, and staff are not compliant with your COVID-19 risk management standards.

Connect our COVID-19 Campus Analytics solution to your Student Information System (SIS) to better view risk on campus.

Visualize and understand where on campus to apply your limited testing and response resources.

Take action with your data to make better decisions and roll-out necessary additional precautions.

Monitor the effectiveness of your COVID-19 response management plan and data trends over time.

## We believe in the future of data-driven education.

Unlock the value of the data trapped in your systems to improve your decision-making and COVID-19 response.

Eide Bailly's COVID-19 Campus Analytics offering is more than a reporting tool. Our proven solution is designed to give every campus deep insights into where, why, and with whom you have the greatest risk during the ongoing health crisis. When combined with our decades of higher education expertise, our clients have a powerful partner to manage risk and control compliance.

Wherever you are in your data journey, we can help.

### Your Data in Action

Interact with your COVID-19 testing and symptom data in new, meaningful ways across your entire campus.

Customize your view by:

- Symptomatic vs. Non-Symptomatic
- Campus Population (Building, Program, At-Risk Faculty)
- On-Campus vs. Off-Campus Housing
- Available Testing Results
